

### **phytochemicals pdf**

Phytochemicals are chemical compounds produced by plants, generally to help them thrive or thwart competitors, predators, or pathogens. The name comes from Greek, Modern ἵππος (phyton), meaning 'plant'. Some phytochemicals have been used as poisons and others as traditional medicine. As a term, phytochemicals is generally used to describe plant compounds that are under research with ...

Background. The health benefits of greenspaces have demanded the attention of policymakers since the 1800s. Although much evidence suggests greenspace exposure is beneficial for health, there exists no systematic review and meta-analysis to synthesise and quantify the impact of greenspace on a wide range of health outcomes.

An antioxidant is a molecule that can slow or stop the oxidation, or electron transfer, of other molecules.. Antioxidants can be found in food. Antioxidants are molecules that relieve oxidative stress by preventing the formation and oxidation of free radicals. Antioxidants donate one of their electrons or hydrogen to free radicals, stopping their chain reaction.
